**REVIEW TO THE ARTICLE  
THE CONCEPT OF THE DRAFT FEDERAL LAW  
"FOREST CODE OF THE RUSSIAN FEDERATION"**

**A.Yu. Francuzov**

The author of the Concept demonstrates a scientific approach and a professional point of view. The author offers a number of new and interesting ideas. In general, the article does not contain defiantly unacceptable judgments, and you can unconditionally subscribe to a number of them. The fact of the existence of such a Concept, obviously, increases the chances of success for the next, new edition of the Forest Code. A significant increase in the forest role of the regions is correctly proposed, although this will certainly increase the number of references and blankets in the text of the law.
